

AMITY UNIVERSITY JHARKHAND — OFFICIAL ACADEMIC PROSPECTUS 2026

1. REGULATORY ATTENDANCE MATRIX

All enrolled students across undergraduate and postgraduate divisions must maintain a strict minimum attendance threshold of 75% per individual course block. If a student's attendance drops between 60% and 74%, they are barred from standard examination routing unless an official Medical Waiver Request Form (Form AM-MED-01) is filed with the Academic Registrar within 48 hours of recovery. Any attendance recording below 60% results in an automated systemic course block, requiring a complete course repetition in the subsequent semester cycle.

2. ADVANCED DEGREE SPECIALIZATIONS

The School of Engineering and Technology offers the premium B.Tech in Artificial Intelligence & Security Core degree path. This program requires a total completion ledger of 160 credits across 8 semesters. Key specialized modules include Course Code AI-401: Vector Retrieval Architectures & Neural Embeddings (4 Credits), Course Code SEC-402: Asynchronous Multi-Agent Safety Frameworks (3 Credits), and Course Code RAG-403: Retrieval-Augmented Generation Scaling & Context Ingestion (4 Credits).

3. GRADING & ACCREDITATION STANDARDS

Evaluations are compiled using a 10-point Relative Cumulative Grade Point Average (CGPA) system. A student must achieve an absolute minimum CGPA of 4.5 to clear graduation allocation scripts. Distinction honors are programmatically locked behind a strict 8.5 CGPA gate condition with zero active backlogs or disciplinary compliance marks on record.
